

PERSONAL STATEMENT

I'm a 22 year old web developer and sometimes designer from Boston, MA. I love everything that has to do with design & web development, Graphic design, and how they can be used to improve upon everyday life. I also love music and reading. They're kind of the driving forces in my life.

I have plenty of experience working with people in many different environments. I've worked in many different industries and am always up for trying something new. I try to have genuine connections with the people that I interact with.

If you think I might be a good fit, reach out!

LANGUAGE SKILLS

WORK EXPERIENCE

1

From 2014 to 2016
Front End Web Developer
Boston Globe
Boston, MA

2

From 2013 to 2014
That Counter Guy/Cook
Otto Pizza
Cambridge, MA

In this role, I worked with designers, developers and product to update and create new features on the Boston Globe website. It required me to be responsible for meeting deadlines as well as having a heavy focus on teamwork.

The role involved open and constant communication in order to create projects with a focus on the Greater Boston community.

Here, I pretty much took on whatever was required of me and had to learn a lot in a short amount of time.

Working at the counter, serving slices, and occasionally cooking when it was needed of me, I did whatever I had to do to help keep things running smoothly in a busy shop. Throughout all this, I also had a lot of fun with the team I worked with.
